

To whom it may concern,

Due to the appearance in the last years of different outbreaks of infectious diseases many health centers in Catalonia are demanding, to the sanitary personnel and the students in training, to be correctly vaccinated of: COVID-19, Hepatitis A+B, Tetanus, Triple Virus, and DPT.

Therefore, before the beginning of the internship in these centers, the student has to prove, by means of an "official medical certificate", to be up to date with these vaccinations.

Sincerely,

Alicia Lluva
ESIMar Practicum Coordinator
